COLLEGE VACANCY SURVEY

JUNE 1, 1972

Conducted and Published by

THE WESTERN INTERSTATE COMMISSION FOR HIGHER EDUCATION

RECEIVED JUN 19 1972 NMSU E.R.I.C.

The COLLEGE VACANCY SURVEY is conducted by the office of Special Higher Education Programs at WICHE each May as a service to institutions of higher education and the public that they serve in the 13 WICHE states. The 1972 Survey has been computer processed.

The following information is important to understanding and using the Survey:

1. All vacancies are for Fall term, 1972.

2. CATEGORIES: Institutions are divided into two-year and four-year categories within states, with freshman and transfer vacancies reported for each institution.

3. STATISTICS: 443 colleges and universities were surveyed by questionnaire in May, 1972, and 287 of those institutions responded. Vacancies are summarized by state at the beginning of the report. The most important point in regard to these statistics is that they represent the minimum number of openings reported by the colleges and universities -- this occurs because there is no way of indicating numbers for the institutions that have stated an open door admissions policy, a trend that is increasing in frequency among western institutions.

4. FOOTNOTES: An asterisk in the footnote column, immediately to the right of the name of the school, indicates qualifying information about vacancies or contains other important data. Please read.

5. APPLICATION DEADLINES: Specific information regarding application deadlines is given when available. Students are reminded that they should contact the institution of their choice directly, but that they should not reapply to any institution that has already denied them admission. Students will still be admitted on the basis of each school's requirements.

Additional copies of this report are available without charge from: College Vacancy Survey, WICHE, P.O. Drawer P. Boulder, Colorado 80302.

COLLEGE VACANCY SURVEY

JUNE 1, 1972

Conducted and Published by

THE WESTERN INTERSTATE COMMISSION FOR HIGHER EDUCATION

The COLLEGE VACANCY SURVEY is conducted by the office of Special Higher Education Programs at WICHE each May as a service to institutions of higher education and the public that they serve in the 13 WICHE states. The 1972 Survey has been computer processed.

The following information is important to understanding and using the Survey:

1. All vacancies are for Fall term, 1972.

2. CATEGORIES: Institutions are divided into two-year and four-year categories within states, with freshman and transfer vacancies reported for each institution.

3. STATISTICS: 443 colleges and universities were surveyed by questionnaire in May, 1972, and 287 of those institutions responded. Vacancies are summarized by state at the beginning of the report. The most important point in regard to these statistics is that they represent the minimum number of openings reported by the colleges and universities -- this occurs because there is no way of indicating numbers for the institutions that have stated an open door admissions policy, a trend that is increasing in frequency among western institutions.

4. FOOTNOTES: An asterisk in the footnote column, immediately to the right of the name of the school, indicates qualifying information about vacancies or contains other important data. Please read.

5. APPLICATION DEADLINES: Specific information regarding application deadlines is given when available. Students are reminded that they should contact the institution of their choice directly, but that they should not reapply to any institution that has already denied them admission. Students will still be admitted on the basis of each school's requirements.

Additional copies of this report are available without charge from: College Vacancy Survey, WICHE, P.O. Drawer P. Boulder, Colorado 80302.

FOOTNOTES
